

Capital : Volume III

Marx, Karl

SINOPSIS

Unfinished at the time of Marx's death in 1883 and first published with a preface by Frederick Engels in 1894, the third volume of *Das Kapital* strove to combine the theories and concepts of the two previous volumes in order to prove conclusively that capitalism is inherently unworkable as a permanent system for society. Here, Marx asserts controversially that - regardless of the efforts of individual capitalists, public authorities or even generous philanthropists - any market economy is inevitably doomed to endure a series of worsening, explosive crises leading finally to complete collapse. But he also offers an inspirational and compelling prediction: that the end of capitalism will culminate, ultimately, in the birth of a far greater form of society....
